JIRA Screenshots

Introduction

This document presents a series of Jira screenshots that demonstrate how I'm deliverables translated into actionable work items within the Shopping App project.

Each epic corresponds to a functional requirement defined in the FRD and is further broken down into user stories and granular tasks or sub-tasks.

The screenshots reflect the logical hierarchy followed in Jira:

- Epics represent key functional modules

- User Stories capture end-user goals aligned with business needs

- Sub-tasks detail the development and testing steps required to implement each story
